

ACE/400 Version 3 Supports Microsoft VBA Products

Advanced Client EasyCom /400™

MIS Systems Corp announces the availability of the latest RAD client server tool for Visual Basic & the AS/400

Nashville, TN March 16- MIS Systems Corporation introduces the availability of the latest product in the Client/Server arena ACE/400™ for AS400. This is the most advanced Client/Server tool that integrates AS/400 with Visual Basic and uses native commands and record level access. It gives the Visual Basic developers seamless access to the AS/400 platform. It shields them from the complexity of coding advanced APIs to access AS/400 data, and brings rapid application development to the VB – AS/400 developer community.

“We are very excited to introduce the new product line the ACE/400™, which is the most advanced Visual Basic AS/400 middleware solution to date,” said Al Malek, CEO of MIS Systems. Here at MIS Systems we have put together user friendly interfaces to provide a complete solution for the AS/400. It will expose the world of the Internet to access your AS/400 in a flash. This powerful tool will shatter the limits of the green screen and take your AS/400 application developments to new heights.”

MIS Systems has acquired a reputation for state of the art software solutions for the AS/400. We kept our customers on the cutting edge of technological advancements. Well known for the introduction of Record Level access to the AS/400 for Delphi, in January of 1996, has finally decided to start offering a VB solution for the AS/400 community.

Advanced Client Easycom/400 Product Specification

ACE/400™ is a tool used to develop Client Server Applications for the AS/400. By minimizing the necessary program coding, and providing native access to all AS/400 objects, from data files to communicating with pre-existing CI, RPG, or Cobol programs over any communication protocol including TCP/IP. ACE/400™ makes the promise of record level access and rapid application development a lightning reality.

ACE/400™ gives the VB Client Server Solution for the AS/400 a new meaning. It eliminates the need for ODBC by giving direct access to the source, and simplify the development by providing AS/400 oriented components to the Client Server developer.

MIS Systems is offering a tool that makes the migration to ClientServer implementation a viable solution that does not cost you an exorbitant price. The complete ACE/400™ software package is available to download from the MIS Systems Web site.

MIS Systems was founded in 1993. It develops, sales, and supports information systems solutions for the AS/400 Community. Strong by a network user sites worldwide. MIS Systems is headquartered in Nashville, TN.
